

akaAT ecosystem

Studio

Codeless GUI to build automation test scripts for Web, Desktop, Mobile, and API without coding skills.

Test Engine

Configure and trigger tasks, productively streamline and optimize testing processes.

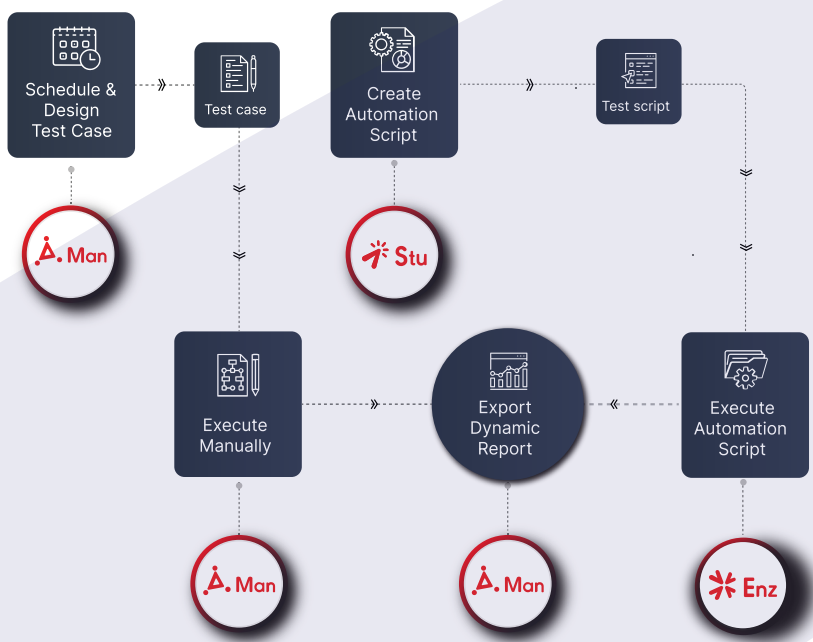

Test Management

Enhance test quality in real time with advanced management tools, teamwork features, and dynamic reports

Test Engine

Provide online mobile devices compatible with multiple platforms for testing

akaAT Workflow Model

About akaAT

In the digital transformation era, speed is the new currency. Testers and developers are racing to roll out quality, bug-free software to the market as fast as they can. Yet, the traditional approach is tedious, given its manual nature, the spiking demand, and the lack of a skilled workforce.

With more than 23 years of experience in the technology industry, FPT Software - the global Software Powerhouse, has recognized the issue testers now facing. To clear such bottleneck, we developed akaAT - an all-in-one test automation solution enabling testers, from beginner to expert levels, to create tests for Web, Mobile, and Web Service without a line of code.

Studio

An automation testing tool for all testers. Users can build sophisticated automation test script for Web, Desktop, Mobile, and API without code skills.

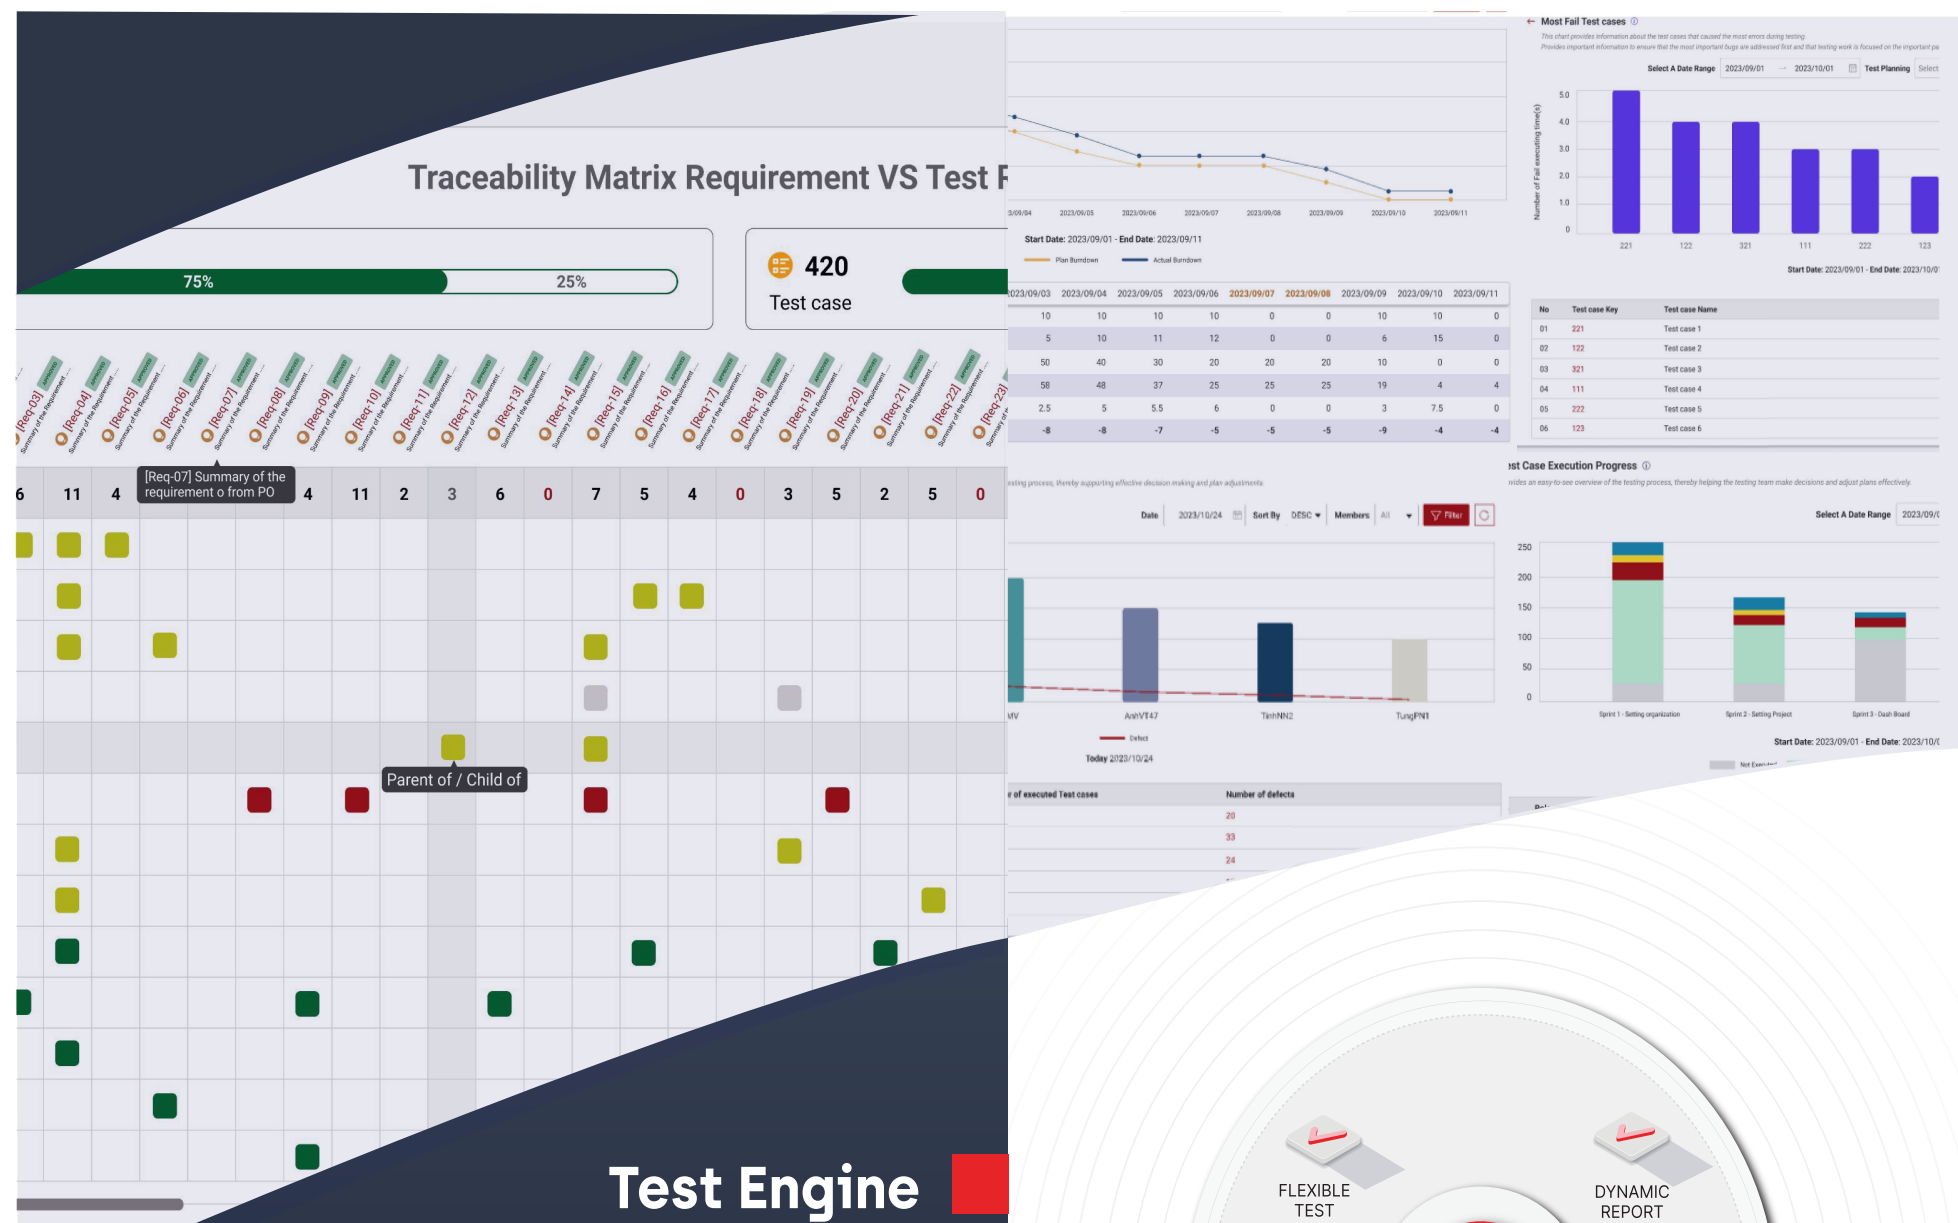

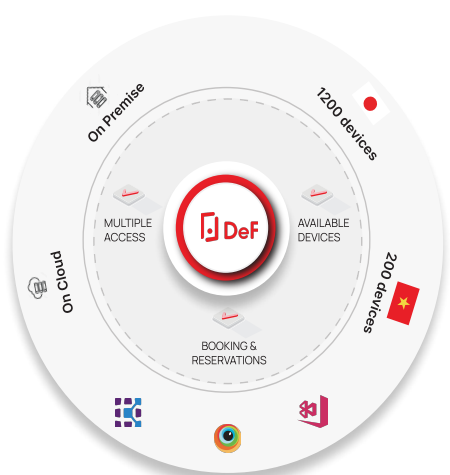

Benefits

- Save up to 50% effort compared to manual testing
- Powerful low-code platform
- Free to use

Device Farm

akaAT Device Farm provides you with a wide range of online mobile devices, which are compatible with multiple platforms, for any testing purpose. Device Farm lets you execute tests on devices concurrently up to your demands, whether it is for manual or automation tests, enhancing your remote testing journey with real-world experience and improving shipping quality.

Test Engine

The ultimate orchestration platform where users can configure and trigger tasks, streamlining and optimizing testing processes with increased productivity.

Benefits

- Full control of the testing process
- Data report insights
- Shorten the testing time

Management Solution

The platform enhances your test quality in real-time with advanced management tools and teamwork features

Benefits

- Simplify management work
- Boost collaboration productivity
- Enhance your test quality
